SUPRITH R KENJOOR

Cybersecurity Graduate – SOC Operations

Dubai, UAE | +971 56 5536697 | skenjoor25@gmail.com | linkedin.com/in/suprith-kenjoor

SUMMARY

Entry-level **Cybersecurity graduate** with hands-on exposure to **ISO 27001 operations and SOC fundamentals.**

Experience includes **building risk registers, supporting internal audit simulations, performing vulnerability assessments**, and **analyzing logs** during incident response labs.

Strong foundation in **control mapping, audit evidence handling, and technical security basics**.

Seeking **Junior SOC** under structured security teams.

EXPERIENCE

IT Security & Systems Intern (Exposure Role) - Emircom - Dubai, UAE |Feb 2025 – Apr 2025

- Assisted in exploring a **web-based internal tool related to email data handling** as part of a learning-focused assignment.

- Analyzed backend API data flows related to email processing and identified **security and system limitations.**

- Gained exposure to **access control concepts, logging requirements, and secure data handling** through guidance and self-learning. Documented technical constraints and potential security considerations for internal tooling.

- Gained practical exposure to **logging concepts, access control, and secure system design**

ISO Standards Intern - British Standards Institution (BSI) - Dubai, UAE | Jan 2025 – June 2025

- Developed ISO 27001 **risk registers** covering 10+ business risks with likelihood, impact, and mitigation mapping.

- Supported **gap analysis and simulated internal audits, including control mapping and audit evidence review.**

- Assisted in **risk treatment planning** and ISMS documentation aligned with ISO/IEC 27001:2022.

- Contributed to compliance readiness activities supporting **ISMS implementation and audit preparation.**

SOC & Security Projects

OpenVAS Vulnerability Assessment - OpenVAS, Linux VM

- Conducted full vulnerability scans, prioritized high-risk items, and mapped findings to ISO 27001 A.12.6.1 (Technical Vulnerability Management).

Incident Response Simulation - Kali Linux, Wireshark

- Simulated brute-force attack traffic, identified IoCs, analyzed abnormal packets, and drafted a structured incident response plan (containment + recovery steps).

Network Recon & Packet Analysis (SOC Foundations) - Kali Linux, Nmap, Wireshark

- Performed reconnaissance and packet analysis to identify exposed services and abnormal traffic patterns relevant to SOC monitoring.

CERTIFICATIONS

ISO/IEC 27001:2022 Lead Implementer (**BSI**)

ISO/IEC 20000-1:2018 Lead Implementer (**BSI**)

ISO/IEC 9001:2015 Lead Auditor (**BSI**)

EDUCATION

Bachelor of Engineering – Computer Science & Engineering

NMAM Institute of Technology, India | First Class with Distinction | CGPA: 8.18/10

SKILLS

SOC: Log Analysis (Foundational), Incident Handling (Simulated), Vulnerability Management

GRC: ISO 27001 ISMS, Risk Assessment, Internal Audit Support, Control Mapping

Tools: Wireshark, Nmap, OpenVAS, Kali Linux, Splunk (Basics), Microsoft Graph AP
